professional lighting of shop areas

more than **20 years** of experience and market presence

---

---

Good lighting of the fashion industry stores complements the decor and the displayed goods. Proper lighting allows real colours to be rendered, encourages the customer to visit the zones we care about, makes the orientation in the store easier. The main lighting in the store should fulfil its function without drawing to the customer's attention. Thanks to professional LED lighting, we can achieve effects previously unachievable.

---

traditional lighting

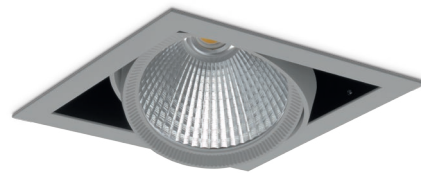

dedicated lighting

more than **20 years** of experience and market presence

One of the most important places in the store is the shop window. Looking through it the customer decides to enter the store or even to choose a product. Although, even the best designed shop window will not perform its function without lighting. Based on over 20 years of experience, knowing the trends in the industry and the requirements set by shopping malls, we will design the lighting of your store providing the best exposure, customer comfort and energy efficiency.
