

FOOD

professional lighting of grocery stores

more than **20 years** of experience and market presence

Proper illumination of food products emphasizes their freshness, and better colour saturation attracts customers. We already have the possibility of using energy-efficient LED lighting dedicated to all of significant product groups: meat, sausages, poultry, bread, cheese, vegetables, fruits, wines and other spirits. We can apply any colour of light in any luminaire to enhance your products.

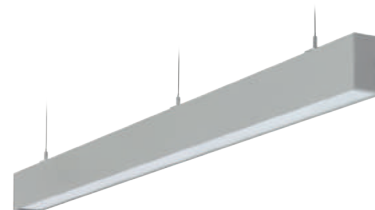

traditional lighting

dedicated lighting

more than **20 years** of experience and market presence

In addition to the accent lighting in each store, it is necessary to properly illuminate the cash registers zone, aisles between shelves, storage section, emergency lighting. Making the lighting project before implementation allows us to choose the quantity, type, arrangement of lighting fixtures so as to meet the requirements of standards and create the atmosphere suitable for the customer, thereby increasing sales.
